

CRYSTOLIS

THE NEWEST MEDICAL DISCOVERY

FOR THE TREATMENT OF

BALDNESS

AND ALL OTHER

SCALP AND HAIR DISEASES

Not for sale by Druggists

IT IS A SINGULAR FACT that, notwithstanding the great strides that have been made in medicines for the past decade or two, scalp diseases—and particularly dandruff—the worst of them all—are about as little understood by the medical profession to-day as they were a generation back.

SCALP AND HAIR TROUBLES are the most prevalent of all diseases, and statistics show that at least 90 per cent. of humanity have disease of the scalp in some form or other. It may be that physicians have failed to give these troubles the proper amount of study because not being a fatal disease they have considered it unimportant enough to willfully neglect its thorough diagnosis, although nothing is more disgusting than to see a man's or woman's shoulders covered with dandruff and dead hair.

CAUSE OF BALDNESS, DANDRUFF, ITCHING SCALP,

FALLING HAIR, ETC.

BALDNESS, DANDRUFF, FALLING HAIR, etc., in 99 cases out of a hundred is caused by a living parasite that actually gnaws its way back and forth and in and around the hair roots until the whole scalp becomes affected. These animal micro-organisms are usually brought on to the head by the use of combs, brushes, etc., which have been used by other persons. Men are more susceptible to baldness simply because they are less cautious about using combs in public places than women are. These parasites multiply rapidly when once they come, and often as many as a dozen are found by microscopic examination to be feeding around one hair shaft, like weevils at the base of a tree. They eat the natural oils away from the hair and penetrate the hair itself. They do not go down into the follicle; they exist always near the surface of the scalp. They are very tenacious. A mere shampoo has no palpable effect upon these parasites—a few dozen may be washed away, but they are soon replaced. It is indeed fortunate that they are parasites and not germs or microbes, because if they could exist down into the hair follicles near the roots, they would kill the roots and there would be no hope of recovery of the hair. As it is they eat off the hair just under the outer covering of the scalp and this action causes the bulb that contains the hair root to close, although the roots themselves will live for years encased and well preserved in these minute bulbs on heads that have been bald for years. But how can these parasites be killed and the bulbs made to open so the hair will shoot forth again? By the use of "Crystolis." It destroys the deadly parasites by the first application; it opens the hair bulbs and stimulates the action which is necessary to produce hair growth.

HAVE YOU TRIED SO CALLED HAIR GROWERS?

If so, you are probably disappointed, disheartened and discouraged, and we do not blame you. The circular matter of many

of these specifics, teem with promises never fulfilled. Many of them require you to rub grease or oil of some kind into the scalp by the hour expecting results which are generally never obtained. But simply because one person or a thousand persons have failed to discover a hair grower is no proof that it cannot or has not been done. New inventions are made every year which change the impossibilities of yesterday into the realities of to-day. Five years ago the telegraph needed a wire to do its work. To-day, thanks to Marconi, a mere youth, the wireless telegraph picks up man's messages out of the ether. Five years ago the air was the exclusive domain of the birds,—man did not trespass upon it; to-day the flying machine is a fact, and soon the flight of man will outstrip the flight of the birds as much as the swiftest automobile does the plodding, inert donkey. Until the telephone was discovered the idea of talking over a slender wire would appear ridiculous and absurd.

WE BELIEVE we have the only truly scientific hair grower that has ever been discovered. We do not make this statement egotistically, but on the contrary we concede that the discovery was somewhat of a lucky accident; just one of those things you happen to strike. Most concerns that advertise hair preparations send you a sample. Then they write you that of course you cannot expect to have definite results from so small a sample, but they urge you to buy expensive medicaments, etc. Then they write you glowing letters that you cannot expect results in a week or two weeks, but you must keep on and be persistent. You daily apply the treatment, rubbing it into the scalp until your fingers ache watching for even the slightest change in the condition of your scalp, but the hair seems to refuse to grow with a persistency that is simply exasperating.

WE GUARANTEE TO GROW HAIR ON ANY HEAD IN TEN DAYS' TIME, IF ANY HAIR ROOTS REMAIN, OR MONEY BACK

Unlike most hair specialists we do not ask six weeks or even a month to produce results. We do not claim that we will make your hair grow six or seven inches in that time, but we will produce a new and luxuriant growth of live hair and convince you beyond the shadow of doubt that "Crystolis" is a genuine hair grower, or back your money goes, and if you will continue to use the treatment as directed we will guarantee that it will grow as long and heavy as you could wish for.

LOOK AT YOUR HAIR TO-DAY.

Watch for the tell-tale signs of baldness. Remember that dandruff, falling hair or any unnatural condition of the scalp is but a warning of coming baldness and should be attended to at once. Do not wait until your head is so bald that it shines like a billiard ball, but commence the treatment to-day. "Crystolis" is also unsurpassed for making the hair light and fluffy and for imparting to the hair a beautiful gloss and lustre.

WARNING.

Beware of preparations that contain sugar of lead, cantharides, dyes, or coloring matter of any kind. They may have a pleasing effect on the scalp, but they will ultimately ruin the hair roots and destroy the follicles, thus bringing about certain baldness. We positively guarantee that "Crystolis" conforms to the Pure Food and Drugs Act passed by the United States Congress, and that it does not contain the slightest quantity of sugar of lead or cantharides in any form.

HOW TO MAKE YOUR HAIR GROW AND CORRECT UNNATURAL CONDITIONS OF THE SCALP.

We do not believe that hair can actually be made to grow by the use of hair tonics, bay rum, grease, salves or other preparations of this kind. The majority of such preparations are only food for the parasites which destroy the hair growth. By the use of "Crystolis" these parasites are immediately killed, the scalp is nourished, the hair follicles and bulbs that contain the hair roots are induced

to open and strong live hairs come forth. It is also unsurpassed for the cure of dandruff, as dandruff is no more or less than dead skin which the parasites have gnawed loose from the scalp itself. It is one of the very best treatments for producing a clean, healthy scalp and for imparting to the hair a beautiful and glossy lustre.

PREVENTS FALLING HAIR.

IF YOU WISH to stop your hair from coming out, if you wish to keep your hair its natural color and be the possessor of a clean, healthy scalp, you will find "Crystolis" unsurpassed for such purposes. It is much easier to prevent your hair from coming out than it is to promote a new growth after you have once become bald. Therefore we advise every man, woman and child who has any regard for his or her appearance, to obtain "Crystolis" and use it occasionally. It contains no harmful ingredients, but on the contrary we regard it as extremely beneficial to the scalp. If you will once use "Crystolis" and see what a nice glossy appearance it gives to your hair and how it brings out the beauty of its natural color, we feel confident that we will never need urge you to purchase it. For the present we are offering to furnish it at an exceptionally low price, providing you will recommend it to three of your friends after we have succeeded in your own case. We ask this as we want the merits of "Crystolis" to be known everywhere, and we believe that this method is much cheaper than advertising. We do not ask you, remember, to recommend it to a single person until it has produced good results in your own case, and you are convinced that it will actually grow hair and produce a clean, healthy scalp by an actual demonstration on your own head.

TO YOUNG PEOPLE.

Those who have not lost their hair but who wish to care for it in the best possible way so as to retain its natural color, its beauty and lustre for years to come will find "Crystolis" to be of the greatest value. It keeps the scalp nice and clean, imparts to the hair a beautiful lustre, and brings out its natural beauty to a surprising degree. Beware of hair tonics which contain ingredients which are deleterious to the scalp; which produce a pleasing effect to-day at the expense of to-morrow, which gives an agreeable sensation with the inevitable result of a complete loss of hair and scalp troubles of the worst kind. We guarantee "Crystolis" to be absolutely pure under the United States Pure Food and Drugs Act. If your hair to-day is in good condition, keep it so. "Crystolis" will enable you to go through life with a beautiful head of hair and a clean, healthy scalp, which will be admired by all who know you. If you use "Crystolis" you save the expense of using any other hair preparations, no matter for what purpose, as "Crystolis" covers the whole field. Your scalp needs nothing else.

SAMPLE TREATMENT.

 **CRYSTOLIS** is of such a nature that we cannot send out samples. If we were to send you a salve or an ointment of some kind we could easily send you a sample, but the very nature and character of "Crystolis" is such that it is not feasible to send anything other than a full course of treatment, so please do not write us for samples. We are willing, however, to send a full course of treatment with the distinct understanding that if after using it for 10 days you are not surprised and pleased with the transformation that has taken place and convinced that the continued use of the treatment will give you a beautiful head of hair and produce the results which you desire, you can return it charges prepaid, and your money will be refunded, every penny you have paid, as per conditions set forth in our Guaranty Contract and Bond. You must admit that this is a far better proposition than the plan of sending out a small sample, even if it were possible for us to do so. You have probably had samples that did nothing, but the literature induced you to buy more of the product. You bought them. Have you obtained results? Did you obtain results at any time? You bought on faith and you kept buying on faith. Now we offer to show you positive results, then let you determine whether or not you want

to continue the treatment. It is not a matter of faith. It is not a matter of what we say, but if after using the treatment 10 days the results which it produces do not convince you that "Crystolis" will do what we claim, then send it back at once, and get your money.

START A NEW HAIR GROWTH IN 10 DAYS' TIME.

WE DO NOT ASK you to stand before your mirror by the hour, rubbing some worthless preparation into your scalp until your fingers ache and you are sick at heart. We do not ask you to singe your hair or do other things that are disgusting and disliking to you. We grow your hair by a simple and natural process that feeds the hair roots, nourishes the scalp and at the same time kills off the parasites which are gnawing your hair away. By feeding and nourishing the scalp and by bringing about healthy conditions, gray or faded hair is restored to its natural color and the scalp put in the best possible condition. Give us two minutes at night and three in the morning and "Crystolis" will do the rest. No long waits, no tedious delays. We acknowledge that our statements may seem incredible, but remember if your not satisfied, back goes your money. Read our guarantee which means just what it says. We are thoroughly reliable and if the slightest doubt exists in your mind upon this point, write to the Anthracite Trust Company, of Scranton, Pa., and they will tell you we are financially responsible and will do as we agree. We will refund every penny you pay us according to the terms of our Guaranty Contract (a copy of which we enclose), if results are not entirely satisfactory. This is a plain business-like agreement, so plain that no one can misunderstand it. Use the treatment 10 days as directed and if after that you are not convinced that it will do all and more than we have claimed for it, send back the unused portion of the treatment and we will refund your money. We take all the chances and leave it for you to decide. Could anything be fairer?

COST OF TREATMENT.

IF YOU will agree to hold as confidential, the offer we make you, and will agree to recommend it to three of your friends, provided we succeed in your own case, we will make you a very low offer, an offer so low that we feel confident you will not hesitate to take advantage of it at once. We therefore enclose you a Special Order Blank which contains this offer. We do not desire to accept your order unless you fully intend to recommend it to three of your friends after we have given you satisfactory results.

BEWARE OF IMITATIONS.

As soon as anything good is discovered counterfeiters immediately begin work. Unscrupulous people who have learned of the marvelous success of "Crystolis" in producing a new growth of hair, correcting dandruff, and in restoring gray hair to its natural color, will immediately follow in our footsteps. They will make all sorts of treatments and all sorts of prices. Their promises will never be fulfilled, and their prices, however cheap they may seem will be dear. "Crystolis" can only be obtained in America from our own laboratories here in Scranton, Pa.

It is not for sale by druggists, and if you permit yourself to be misled into the purchase of some other treatment which name may sound like or be similar to "Crystolis" you will be disappointed. But after this warning you cannot reasonably hold us responsible for it.

We prepay all charges so there is nothing further for you to pay on receipt of the package.

Address all communications and make all remittances by express money order, post office money order, registered letter or bank draft, payable to
